Grace Air Cleaner

timeless
CLASS!

ElectroMax

Breathe free **Breathe Euromate®**

Away with irritation and smoke nuisance!

Say goodbye to headaches, apathy and irritations to eyes and bronchi... No more smoke nuisance and arguments about smoking ... The Grace Air Cleaner filters out all kinds of air pollution including tobacco smoke and creates a pleasant living and working environment. Clean indoor air has a positive effect on work performance and productivity and reduces illness-related absence.

Stop pollution of the indoor air!

The air in offices, computer, refreshment and meeting rooms, and reception areas is full of millions of invisible harmful particles, such as dust, micro organisms (bacteria, viruses, fungi and pollen), hairs, aerosol and, last but not least, tobacco smoke.

Pure innovation.

No other air cleaner can compare with the Grace Air Cleaner:

- High filter performance
- Can be placed anywhere; a floor area of only 29 x 38 cm is needed
- Magnificent design that enhances any workplace
- Makes less sound than an average desktop computer
- Simple one button operation

Technical information

Reach	up to 100 m ³
Airflow	495 m ³
PRR	300 m ³ /h
Fan speeds	3
Filter set	Prefilter, Electrostatic filter, Activated carbon filter
Control	1-button operation
Mounting	freestanding
Dimensions	380 x b 290 x h 850 mm.
Weight	15 kg.
Power supply	230 V, 50 Hz / 115 V, 60 Hz
Power consumption	60 W
Guarantee period	12 months
Optional	FreeBreeze (available in various odours)

An air conditioner controls only the air temperature and not the air purity. Opening the windows only results in costly heat losses and the outside air is often so polluted that it is unwise to let it in. The Grace Air Cleaner, however, does remove pollution from the indoor air by filtering out all the harmful particles.

The most graceful style in air cleaning.

A renowned team, winner of many international awards, created the attractive and yet timeless design. The Grace Air Cleaner also received various design awards. The Grace Air Cleaner is available in seven stylish colours, can be placed anywhere without installation and is very simple to operate. The sound level is particularly low, even less than that of an average desktop computer.

Unparalleled performance.

The Grace Air Cleaner has an ingenious filter system, which was developed in-

house by Euromate. Three successive treatment phases clean the indoor air. The pre-filter traps the coarser dust and pollutants such as human and animal hairs and skin flakes. The electrostatic main filter then catches the other, smaller, particles down to a size of 0.01 micron (=0.00001 mm!) such as cigarette smoke. The activated carbon filter adsorbs unpleasant smells. By putting two FreeBreeze fragrance cups in the cup holder, the purified air always smells fresh. For heavy duty applications, two additional cups can be added. FreeBreeze cups are available in various odours.

Clean air all the time.

Your Grace Air Cleaner will always work optimally without any hassle to you when you opt for a service contract. The polluted filters are regularly replaced by clean ones and the subsequent cleaning of the dirty filters is done with a special washing and drying installation, in an environmentally acceptable way.
